Aryan Amigh's Sway Multimedia Project

In this project I will use Microsoft sway to talk about my favorite app to use for school. **Grammarly**

Grammarly is a tool that checks your grammar every time you write an essay, paragraph, or sentence. Grammarly got its name from what it is doing, checking your grammar. Grammarly was invented in 2009 by two guys named Alex Shevchenko and Max Lytvyn. The reason why I chose Grammarly is that it helped me fix many grammar mistakes. I also think more people need to know about this tool because, In my opinion, it is simple and easy to use. In Conclusion, I chose Grammarly because I found the app very useful and easy to use for people whose English is their second language like me.

Benefits of using Grammarly.

1: Grammarly has a lot of benefits. For example, double-check your work or have it installed on your browser so you don't have to leave your site.

2: Another perk that Grammarly has, is that it gives you a different level of checking for each project. You could have one project for work and Grammarly would recommend using a more professional grammar level to make sure that you get the most information out of your essay/project.

3: Grammarly is simple to use. Once you enable it, you can see your Grammarly mistakes and fix them with just a click.

4: Grammarly is free! Unlike other tools that require you a monthly subscription, Grammarly requires nothing other than working the internet.

disadvantages of using Grammarly

Sadly Grammarly comes with some disadvantages so, I will write about them on this list.

1: Grammarly is not a solution to your grammar mistakes. For example, Grammarly cannot teach you better grammar, though it can only check your work for grammar mistakes.

2: You cannot always use Grammarly. Grammarly needs access to working internet to work. Sometimes you need to write a letter to a friend or your boss which means that you need to know proper grammar and good punctuation.

3: Keep in mind that Grammarly is not always correct. There are going to be cases where Grammarly doesn't highlight/underline the right words.

4: Using Grammarly too much might cause you to turn lazy or to getting used to always use your device for double-checking your work.
