## CORE COMPETENCY THAT I CHOSE:

# Critical Thinking

- How did this show critical thinking? First off, I showed how I can explore different materials and actions, because in this project I had to take three different pictures of architecture using different elements and principles of design, and different angles. I showed that I can experiment with different ways with doing thing, because I would take the pictures from other angles to determine the best angle. I identified the criteria I can use to analyze evidence of the different elements and principles of design to make sure I was taking high quality pictures. I showed that I can make choices that will help me create my intended impact on the situation, because I took pictures of the architecture of the school in a way that would look great and fill the criteria, and they also got marked very well. I can analyze my own assumptions and beliefs and consider views that do not fit them, because when taking the pictures, I would ask my teacher for tips on how to take a picture, even if they didn't fit how I thought would be the best way. I can consider more than one way to proceed in an investigation, because that's what helped me come out with the pictures I had, I used many different strategies to show the architecture of the school. Lastly, I can analyze evidence from different perspectives, because I would look at how my pictures fit some of the elements and principles of design.

# THE BEST ONLINE SHOPPING

Amazon

## The Best Online Shopping

Which industry has the **best** online shopping?

The best company to shop from online has to be Amazon, for many different reasons. Today I will be explaining all of them to you, so you know where to shop next.

Whenever you want something but don't want to get up and drive over to the store, Amazon will suit you perfectly! They will deliver right to your front door or mailbox. This will just make everyone happier, which is why the customer satisfaction rate is high, and this leads people to shop with Amazon again, and again.

### Delivery

Amazon's delivery is fast, which makes their company more reliable and better for people looking to shop. In the USA, members with Amazon Prime have access to next day shipping, which means their order should arrive within 24 hours of the purchase. They ship almost everything you could imagine, from Desks and Stuffed Animals, to even Car Parts and Cutlery This is another reason why they are better than any other online shopping industry.

### Innovation

Why do people love purchasing items off of Amazon? Well, Amazon has the ability to manufacture items, so they fit peoples wants and needs. They use various trends to their advantage, which helps them sell a lot of that product, and fit peoples wants. They made the Amazon Alexa, and they have sold over 100 million Alexa's. This is why Amazon is so popular, and why the company will continue to grow.

### Popularity

So just how popular is this company? Well the best way to measure the popularity is around how many people will use Amazon. A study by BloomReach of 2000 people shows just how big of an impact this industry has on people who are looking to shop online. Around 44% of people will go straight to Amazon when needing to shop online, which

## CORE COMPETENCY THAT I CHOSE:

Critical Thinking

- In this project we had to research one person or group and explain why they were the best at what they do. How did this show Critical Thinking? First off, I showed that I can experiment with different ways of doing things, whether it's looking up a different site, or choosing the formatting for the project. I also showed that I can determine the differences between facts and interpretations, opinions and judgments, because I would only write down the facts in my essay to prove they are the best at what they do. I showed that I can explore different materials, because I had to research many different topics about Amazon and what they do. I showed that I can analyze my own assumptions and beliefs, and consider views that do not fit them, because I gave many different points on why they are the best at every category of online shopping, in case one or two points wasn't enough. I can make choices that help me create my intended impact on the audience, and I did that when I presented the many different feats and awards that Amazon has won. I identified the criteria for this project and evaluated all my points to make sure they fit within it, which is why I did well on this assignment. Lastly, I showed I can evaluate the credibility of sources and information, by making sure the website is up to date, and it matches with many other websites.

# A RECIPE FOR REVOLUTION

## A Recipe for Revolution

### Ingredients

3 cups- Monarchy

2 tbsp- Selfishness

1 cup- Taxes

2 cups- Overpopulation

500 mL- Disease

3 cups- Starving People

1 cup- Anger

### Directions

1. Preheat oven to 425°F
2. Add 3 cups of Monarchy and 2 Tbsp Selfishness to a large bowl, set aside for a few years
3. Fold in 1 cup of Taxes into the mixture
4. Get 3 cups of Starving People, and gradually pour in the 2 cups of Overpopulation. Let it sit for 3 years
5. After it sat for 3 years, whisk in 1 litre of Disease (You should start to see an angry reaction!)
6. Grab the Starving People mixture, add all 1 cups of Anger into the bowl
7. Grab the Starving People mixture, and add it to the "Monarchy" bowl
8. Once mixed, add 500mL of Well-Organized Groups and 2 ½ cups of Violence
9. Form into "Overthrow" cakes and bake for 35 minutes.

Once finished, you'll have an Overthrown Monarch and a Democratic society!

# CORE COMPETENCY I CHOSE:

## CREATIVE THINKING

### HOW DID I SHOW CREATIVE THINKING?

I got ideas that are new to my peers, which was making a "recipe" for a revolution with ingredients such as 3 cups of monarchy. I deliberately learned a lot about this subject so I create this list of "ingredients", while making it make sense how they would start a revolution. I made my ideas work because after creating the recipe, I showed how the revolution would actually come to happen. I have strategies to relax to make myself more creative, such as exercise before homework (even a little dog walk). I showed I can make my ideas work within the criteria, because my project fit within all the criteria. I also showed I can build new ideas off of other's, or my previous ideas, because I built off the first couple of "ingredients", and created more and more of them, while staying within the criteria. Lastly, I can build the skills I need to make my ideas work, because I either read over the criteria many times before starting my work, and I thee is no criteria, I look over the situation to see how my ideas will work.
