## What is Kahoot?

It is an educational game, which gives you a multiple choice questions, and this game can be played in groups. It makes learning more fun, because it mixes competition and smarts, which makes it a nice educational tool. It was first released in September 2013, and it launched in March 2013. It was invented to put a spin on learning, it was intended to make learning less stressful and fun, which helps lots of people learn better. It is used in many classrooms as a learning tool for students, or even the teachers.

## Benefits of using this Digital Learning Tool

- Very easy to use tool that helps educate people
- Makes learning a lot more fun, involving education and competition
- Allows for teachers to teach their students in a more creative way, which might help some students learn better
- Lastly, Kahoot is widely used among many classrooms, which shows that the new way of learning really helps many people

## Disadvantages to using this Digital Learning Tool

- It is easy to cheat off of your friends, completely ruining the whole point of teaching people
- Games can get too competitive, to the point where people would rather answer fast than get the answer right, which goes against the learning portion of this tool
- May be used for purposes other than learning, defeating the purpose
- Since its all online, the website may crash, eliminating all use of it
