

# DIGITAL FOOTPRINT

-By Julia-

## HOW MIGHT YOUR DIGITAL FOOTPRINT AFFECT YOUR FUTURE OPPORTUNITIES?

1. Going to a job that take things very seriously will check your background. For example, the last company you worked with, your posts, your friends posts and if it shows behaviors that the company doesn't want then they can reject your application. 70% of the human resource professionals will look at the information to consider if they want you a the job.

2. Applying to got to another school. When going to a private school there is a test, after is a interview. For the people who passes the schools will look into their accounts check what kind of behaviors do they have and some people don't show great behaviors then they will be elimanated.

## DESCRIBE AT LEAST THREE STRATEGIES THAT YOU CAN USE TO KEEP YOUR DIGITAL FOOTPRINT APPROPRIATE AND SAFE.

1. If getting a negative comment you can email them back or connect to them to figure the problem out.
2. Privacy settings should always be on. Sometimes during the period of using social media the privacy setting could just turn off so check everytime to make sure it is on.
3. In each period of time search up yourself so you know what is up in the internet about you so you have a longer time of taking it down.

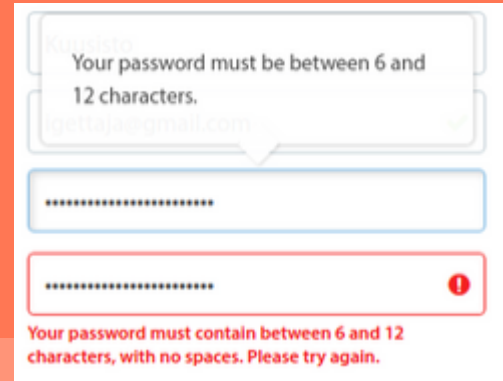

This Account is Private

# WHAT INFORMATION DID YOU LEARN THAT YOU WOULD PASS ON TO OTHER STUDENTS? HOW WOULD YOU GO ABOUT TELLING THEM?

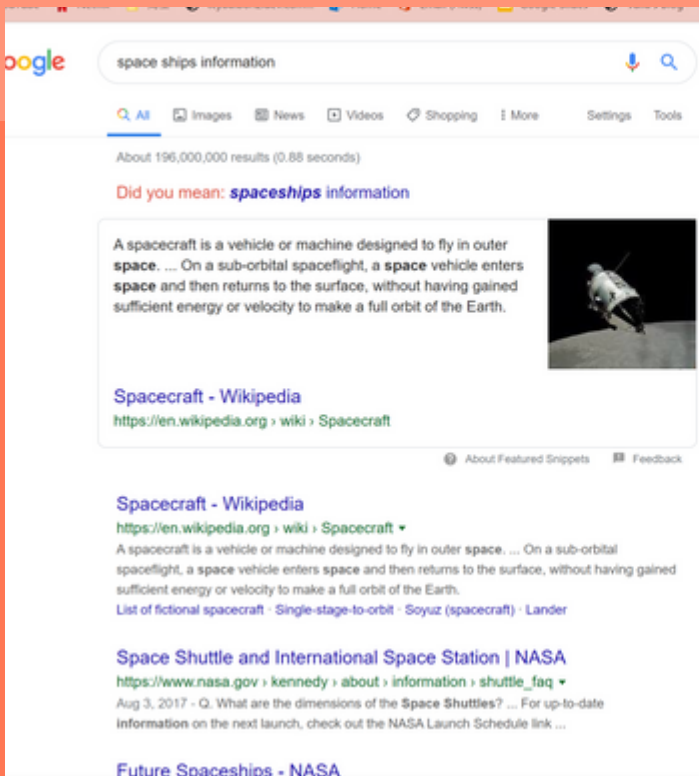

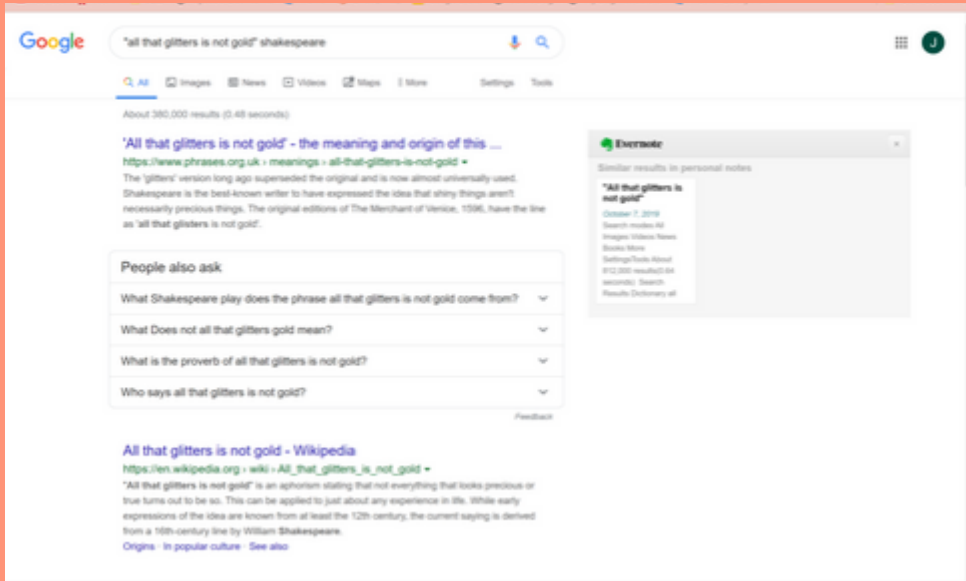

1. I would 100% tell my friend and family to turn their accounts into private.
  - a. If the account is private, accept only the people that you know.
2. I would tell my friends and family to only post pictures that is okay to post.
  - a. Also ask others whether if it is okay to post their pictures.
3. Check the internet security. Sometime when using wifi the internet could take your information.
4. Limite down the amount of private information that is up in the browser.
5. Create a safe password(long password, hard passwords).

# PROPER TIPS FOR GOOGLING/ ONLINE SEARCHING SECTION

## DESCRIBE TWO POSSIBLE SEARCH TOOLS TO NARROW THE FOCUS OF YOUR SEARCHES

1. Searching a quote: search with quotation marks ("")
  - a. This only helps with quote from a website or from a book. When putting the quotation marks in it just helps with your narrowing down the websites to the websites that just have the quotes or related to the quotes.
2. Use (site:url): this can narrow it down to what kind of url it is.
  - a. The good thing about using this is it could limit down many of the websites you don't want to see.

This is an improper search. I search up " spaceship information" and alot more websites popped up. This is not going to help my research because Wikipedia popped up and anyone could change anything on Wikipedia so it is not a great source to use.

# HOW TO SEE IF THE SOURCE IS RELIABLE?

The CRAAP: C= Currency, R=Relevance, A=Authority, A=Accuracy, P=Purpose.

Currency: You will first check the time if the publishing or the update to see if it is up to date.

Relevance: Is the information you need there and is the information relevant to what you need or going off topic.

Authority: Where is it from, who created the information, looking from the URL what does it tell you?

Accuracy: Does the information make sense? Does the information tells you exactly what they want they want to sell you?

Purpose: Why did anyone make these website in the first place?

# PERSONAL NETWORK LEARNING SECTION

## WHAT IS A PLN?

A PLN in my perspective is how people gather online with the same purpose to learn the same subject. They usually gather on a social media to talk to each other or send picture or other ways of communicating to each other. Some of the ways of communicating is Instagram, Twitter, Facebook, YouTube, Snapchat, WeChat, Skype, and Etc.

## WHAT DOES MY PLN LOOK LIKE?

I like to use Instagram and WeChat as my PLN. The reason that I use these two apps is because it is easier to communicate with it and most of my friends and family has it. On Instagram most of my followers are my friends only a few are family members, but it is the opposite from WeChat. Something that I like about both of the apps is they are able to voice record and that helps when I need to communicate really fast.
