INFORMATION

The happy life home, automated house powered by solar only at \$1000 000 provided with everything you need. This house is invented with the smart home technology system. You can control and change your house just with your phone. There are altogether 6 items provided within the house.

First of all, we proudly present the smart bed. The bed that we guaranteed to you that you'll never want to leave your bed ever again. The smart bed is designed for comfort and sleep, with 80-inch touch screen monitors provided with the blue light blocking screen protector. To protect from eye strain and eye damages. On top of the bed, there is an LED light automatic system that can adjust the light level from your night habits, and while you're reading your book at night. You can also adjust your bed and the level of your bed as you wish. Have we mentioned to you that you can load your personal preferences for this bed, for example, your alarms, your work, and media preferences.

The motorized curtains, don't need to wake up early every morning to close the curtains. With this curtain, you can do all of that with your phone. Furthermore, you can customize your curtains, change the colors, change the styles so that you won't get bored anymore. Are you tired of that feeling when you have to wake up early every morning because of the sunlight? Well, problem solved you can set the time to let your curtains close or open any time you want.

No more doing the laundry, our latest machine that we have created, the "Laundrimate". The 3 in 1 machine, it washes and dries your laundry. Additionally, it also folds your laundry, don't need to waste your time and do each thing in different machines. The Laundrimate takes only half an hour to do all your laundry.

The robot butler does your housework all for you. The automatic vacuum cleaner that cleans the house without you having to take it out. Small but intelligent, this robot has the dirty detected technology sensors the dirtier areas in your house and clean them more thoroughly. You can connect your robot to your phone, and the smart mapping can notify you where your robot is and which rooms have been cleaned. When the battery is getting low it returns to its charging place automatically.

Magic Sofa! We all have dreamed about teleportation. Simple but extraordinary, this sofa can teleport you to anywhere you want, just type in where you want to go and one click on the button and it takes you to that place. No more need to worry about time, in rush hours you can just sit on this sofa and it will take you there in just one second.

Invisible pool, the hidden pool that is environmentally friendly. Go Green! Hidden pools need a much lower amount of chemicals needed to maintain them whereas traditional swimming pools require large amounts of chemicals to keep the pH balance accurate. Plus, it saves space you have much more usable spaces compared to traditional swimming pools even with the pool cover you can't walk across the pool. One of the major problems with the swimming pool is they take up a lot of space now with this invisible pool, you can save space when your pool is not in use.

There are many more machines provided with the happy life home, we also have created an app within it and you can adjust many other things using the app. You can adjust the temperature in the house, you can adjust the lights. Everything in the house is connected to your phone. Buy this house, and you won't have to worry about taking care of your house anymore. Control anything just one click. We designed this house to save your time and make your life so much easier.
