

The background is a complex, abstract composition of overlapping organic shapes in various colors including muted greens, earthy browns, soft blues, and dark greys. Some shapes contain patterns of small white dots, resembling a starry sky or digital data. The overall aesthetic is modern and artistic.

# **CORE COMPETENCY: PERSONAL AWARENESS AND RESPONSIBILITY.**

Personal awareness and responsibility had a lot to do with this past digital literacy assignment. It made you research and taught you how to be responsible when using the internet. This project also taught you how your actions and words affect your digital footprint. The project made you research the do's and don'ts of using the internet, which made you more aware and responsible. I learned what to do and what not to do, how to stay safe, and how to protect myself.

# ARTIFACT TWO: SCRAPBOOK

# CORE COMPETENCY: CRITICAL THINKING

This project is related to critical thinking because it makes you think about how you used an app and how it helps you use technology in everyday life. This project required critical thinking, because you had to get creative with your answers and relate them to your everyday personal life. This project has made me realize all the skills that I've previously collected from using apps such as PowerPoint, Word, Excel, Sway, and more. I think that this project is helpful because it makes you remember all the skills you have collected to use in the future.

# ARTIFACT THREE: MANY THINGS

# CORE COMPETENCY: COMMUNICATION

- Unfortunately, I couldn't access my work from last year because my school email changed, however, I will be telling you about some of the work I did last year. Last year, I did multiple excel spreadsheets to collect data for math. That relates to the communication core-competency because I could communicate my thinking and formulas through programming an excel spreadsheet. I think that communicating through an excel spreadsheet is useful, because you have all your formulas on one spreadsheet.
