# Why this blogger?

- I chose the post because it's about round shoulder issues. I had super bad round shoulders from a position of watching computer and phone. I was super insecure, and I always wear a jacket and long neck to hide it. After watching that video, I started to realize the mistakes that were made and started to fix it. After half a year of trying things he shared, I found it made my round shoulders disappear, and I was more confident about myself.
