Summary

There are many great elements to the wonders, Churchill. Most people say that this crisp city is cool and cozy. Churchill is a cozy little city located just North in Manitoba. It is hard to get lost in Churchill due to it only being 56.96km².

Although this city is small, it is packed with activities from dog sledding to ice fishing that you can do with the 899 residents. You may also think that getting around would be tiring due to it being in the mountainous Canadian shield region, but think again for this is a very flat city. Moving to Churchill would be a big change from a big city because it has a very low crime rate and very low housing costs. A house in Churchill with four bedrooms and three bathrooms is being sold for only \$265,000. Talk about low prices. Although Churchill seems good now, what I'm about to tell you will make it great. Churchill is best known for it's poler bears. Something that is exclusive to the far north. Poler bears aren't just the only animal though, there are also beluga whales. So if you want to get away from your busy life, or are planning to retire soon, then come visit Churchill, from our sea to sky, to you, Churchill.

Summary St. Johns

St. John's is a beautiful city with a stunning landscape that incorporates a kind community with an importance to economic power.

St. Johns isn't just a beautiful city with a diverse landscape, believe it or not, it also is a affordable place to live. With average houses on the market for around \$219,000, and rent averaging at \$950 per month, what is there not to love. Talk about affordability. Once you find a perfect house at a perfect price, why not find a perfect friend from over 100,000 residents. St. John's is also economically important, for St. Johns is important in economic activity too. Due to it being the core of the off shore Canadian petroleum industry, along with being the leader of ocean technology.

St. John's is a more superior city over Churchill due to it's higher population and present transportation
