French 8
#1 French Fashion Designer

ASSIGNMENT

RESPONSE

In the French Fashion Designer assignment I need to choose a few French fashion designers and to introduce them. When I was doing this assignment, I didn't know much about French fashion designers, but I was curious to learn related knowledge. When I have almost finished the assignment, I showed it to some of my classmates and asked them how they felt after reading it. They also gave me more inspiration. Then I used Creative Thinking, I searched for some information on the Internet for reference. When I got to know it, I thought design costume was very interesting and I am glad I learned this kind of knowledge. On PPT, I also tried a format that I have not used before. I think I have exerted a lot of my creativity in this assignment because I boldly tried a lot of things that I haven't learned before. Later, when presenting, I boldly added more of my own ideas and some improvised explanations. Although I think I did a good job in this work, I still think many things can be improved and get better. For example, searching for more relevant knowledge to fill in the PPT, will make the PPT look more full.

#2 Change of time

RESPONSE

In this assignment, I need to choose a museum and choose an artifact or other things from the museum. I chose clocks and I talk about the clocks from the ancient to nowadays. I used critical thinking to decide to write about the changes of the clock from ancient times to the present. This forms a contrast, which is very primitive in ancient times. The things they use, where they live, and what they eat are simple, and their daily necessities are not complete. When doing this assignment, I looked for a lot of information on the Internet to help me learn about ancient life. I know more modern clocks and watches because I have seen and used many of them. I also added some of my own understanding and that mix with the information I search express more things I want to explain.
